

OXIRA

ULTRAVIOLET AIR NEUTRALISERS

CLEAN AIR IS THE BASIS OF LIFE FOR PLANTS, ANIMALS AND PEOPLE.

OXIRA units have been developed to provide a convenient source of UV-C and Ozone to help purify your air.

UV-C radiation has a long history of germicidal use as it damages the DNA and proteins of viruses, stopping them reproducing (including **COVID-19**).

In micro-organisms the chemical bonds get disrupted, causing the cells to die.

NOCTURNE ADVANCED MODEL GENTLE FLOW

254nm UV
Germicidal

Fan 12dBa
~ 40m2

5CFM

Internal Reflector

Ideal for medium
size rooms

Higher risk areas
